

Presently up to 2 powered vessels (power boat or PWC) and one non-powered vessel may be at a Type A dock. Amendments have been approved that change this regulation as to the power boats. The new regulations allow 2 power boats and 1 PWC or 1 power boat and 2 PWC's or 3 PWC's on a Type A Dock.(Note: because a non-powered boat is still allowed at a Type A dock, the total number of vessels for a Type A dock has been increased to four if one is a PWC). Development docks will be permitted the addition of PWC's up to 1/3 the number of regular boat slips. PWC Ramps will not be permitted for a PWC that weigh in excess of 500 lbs.
